before treatment

sand-blasting

mixing

**System :**

ZINGA      1 x 60  $\mu$ m  
Epoxy Tar Topcoat

The General Petroleum Company has chosen ZINGA to replace the conventional galvanic protection systems for the underground pipe lines of the Ras Baker Crude Treatment Plant. The application has happened in 2000. These pictures were taken before, during and after the application of ZINGA. On some pictures you will see that the ZINGA has been topcoated with a black epoxy tar paint.
